Fixings and Fasteners

SECTION L

WOODSCREWS

- ✓ When using woodscrews in wood it is **ADVISABLE** to drill a small pilot hole. This will help to prevent wood split
- ✓ A dab of **SOAP** or **CANDLE WAX** along the thread of wood or metal thread screws will aid insertion and removal of screw
- ◆ To ensure secure fixing, use the **CORRECT** size drill bit and wall plug
- ◆ Our woodscrews are suitable for fixing into **WOOD, MASONRY** or other **SOLID** fixtures
- ◆ For other specialist fixings consult your local Hardware store
