

Slimline Modern Metals

Curtain poles for stylish contemporary living

Hunter & Hyland are pleased to introduce the new Slimline Modern Metals range which encompasses a collection of luxury contemporary window dressings including 28mm and 35mm curtain poles, decorative pole sets in small and large fascia sizes and a Roman blind pelmet system. There are up to six beautiful finishes to select from.

The new Slimline range benefits from precision made German components and design together with the robust strength of brass and aluminium plated hardware.

A full range of brackets are available to complement the Pole collection. These include 50mm and 80mm projection brackets, ceiling and wall fix options. Double pole brackets are also available. Bracket options can be discussed at quotation stage to ensure the most appropriate brackets are selected.

Motorisation is available for the 28mm Corded Pole sets.

A Rhythm heading to create waves is available for all Corded and Channel Poles.
