*William Yeoward for Hunter & Hyland
Strata Finials*

William Yeoward

William Yeoward Strata finials are hand blown by artisans in Gloucestershire, England. The Strata design is iconically Yeoward and is based on one of their earliest designs. First the crystal is blown to create the globe, and then ribbons of clear crystal are wrapped around by hand to create this unique texture. The result is an exquisite finial that is available in clear crystal, as well as slate, steel blue and amber.

The crystals are fitted to a solid brass end cap, which can be plated in any of our 12 beautiful brass finishes or painted. They are compatible with our full 51mm pole range: brass, wood and acrylic including poles with rings, corded and motorised poles.

FINIALS

CLEAR CRYSTAL STRATA
Shown with a light bronze end cap and pole

STEEL BLUE CRYSTAL STRATA
Shown with a polished chrome end cap and pole

AMBER CRYSTAL STRATA
Shown with an antique brass end cap and pole

SLATE CRYSTAL STRATA
Shown with a satin nickel end cap and graphite pole

FINISHES

The end caps for Strata finials can be finished in any of our twelve beautiful, bespoke brass finishes; polished brass, antique brass, distressed brass, burnished brass, polished chrome, satin chrome, polished nickel, satin nickel, light bronze, bronze, gun metal or armour bright.

The finials can be used with brass, acrylic and wooden poles, which can be stained or painted to any of our standard colours or to any colour you wish with our colour match service.

BRACKETS

Our full range of 51mm brackets are suitable for use with Strata finials. Full details can be found on our website and in our bespoke pole brochure.

OPTIONS

Strata finials are fully compatible with all Hunter & Hyland 51mm pole systems- so you can choose between uncorded poles with rings, corded poles with or without rings and electrically operated poles. Full details of all of our pole systems can be found on our website and in our bespoke pole brochure.
