

## *Roman Blinds & Accessories*

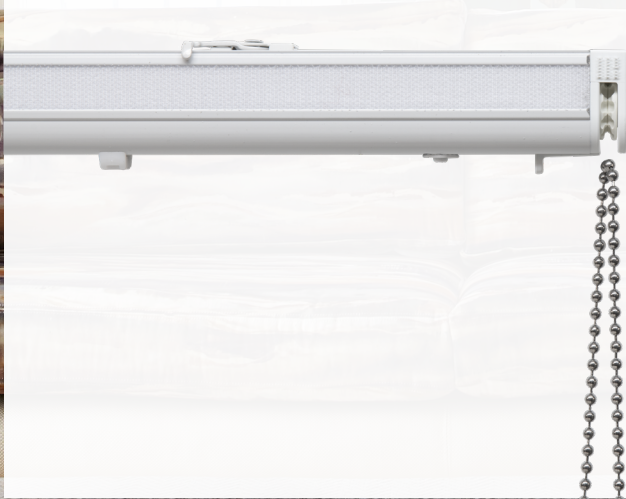

Hunter & Hyland assembles a strong, robust Roman blind system in our Surrey workshop. It complies with BSEN13120 with a functional child safety breakaway that has been tested for both its ability to breakaway and its strength in everyday use. The chain simply slots back into the head rail in the event of it being pulled away. There is no difficult re-attachment, no need for chain breakaway connectors or a wall mounted chain retainer. Just a simple, effective click back into the head rail.

We offer made-to-measure systems, pre-packed kits and individual components, should you prefer to assemble yourself according to individual requirements. The blinds are sleek and durable with a variety of options to suit every blind maker whilst remaining cost effective.

## *Roman Blinds & Accessories*

### MADE-TO-MEASURE (MTM) ROMAN BLINDS

Hunter & Hyland Roman blind head rails can be made to your individual requirements. They are robust and durable whilst also being aesthetically pleasing and discreet as part of an assembled blind. You have the choice of 8 metal bead chains and can also select the types of rod you prefer to work with. It complies fully with BSEN13120 with a smart pull away chain that simply clicks straight back into the head rail in the event of it being pulled away. There is no difficult re-attachment, no need for chain breakaway connectors or a wall mounted chain retainer. MTM Roman blinds remove the need to hold stock of all the components and mean you won't have any offcut wastage.

## MADE-TO-MEASURE (MTM) ROMAN BLINDS

Image shown details all the elements that will be provided in a super lift Roman blind. There are options to select rods and chains.

### Our MTM blind consists of:

- Profile with pre-attached hook tape.
- Child safe pulley housing to comply with BSEN13120 super lift system of 1:4 ratio.
- Cord spools with cord guide and 300cms of 1.3mm lift cord.
- Choice of 8 metal bead chains - polished chrome, polished brass, antique brass, antique silver, bronze, black nickel, satin nickel and stainless steel - made to your specific drop requirement. All made from brass or stainless steel, to prevent risk of rusting.
- Universal smart swivel wall/ ceiling bracket.
- Small white plastic eyelet rings 13mm diameter.
- 38mm sew on loop tape (to attach to face fabric).
- Cord clasps (RBCCS) to comply with BSEN13120 standards regarding child safety.
- For your rods and bottom bars you have three options:
  - Option one - Provided with fibreglass rods and white aluminium bottom bar (22mm x 4mm).
  - Option two - Provided with chrome plated steel rods and white aluminium bottom bar (22mm x 4mm).
  - Option three - Provided with neither rods nor bottom bar- for you to use your own.
  - 1 rod is provided for each 30cm of drop.
- Easy step by step fitting instructions.

### Order specification options:

Alternatively, blinds can be supplied without breakaway using either a 1:1 or a 1:4 sidewinder supplied with a wall mounted retainer.

Blind can be supplied with a universal smart click wall/ceiling bracket.

- ☒ Blind width (specify if measurement is recess size or actual blind width).
- ☒ Blind drop.
- ☒ Fitting height (to comply with BSEN13120 regulations).
- ☒ Left or right hand control.
- ☒ Chain colour.
- ☒ Chain drop. Unless specified, the chain will be 15cm less than the blind drop so that it will still comply with BSEN13120 regulations.
- ☒ Rod and bottom bar preferences.

### Technical specifications:

- Maximum width: 300cms.
- Maximum drop: 500cms.
- Maximum blind load weight:
  - Super lift – 7kg - 1:4 (if you pull the chain 20cm it will rise 5cm).

## CORD SPOOLS AND BRACKETS

### COMPONENTS

Product code	Description	Stock unit	Dimensions	Other info
<b>RBS041</b>	Head rail with hook tape attached	5.8m Length	35mm x 37mm	White powder coated aluminium (can be cut with hacksaw)
<b>RBS042</b>	Square drive rod	5.8m Length	5mm x 5mm	Silver aluminium (can be cut with hacksaw)
<b>RBS043</b>	Cord spool with 300cm of cord	Each		
<b>RBS044</b>	Swivel lock universal bracket	Each	Backplate 27mm x 24mm	Top or face fix. White powder coated steel. Requires 6g screws (not supplied)
<b>RBS045</b>	Spring click universal bracket	Each	Backplate 37mm x 26mm	Top or face fix. White powder coated steel. Requires 6g screws (not supplied)
<b>RBS046</b>	Polyester lift cord	500m Reel	1.3mm diameter	100% polyester
<b>RBS047</b>	Child safe sidewinder control 1:4 Super lift	Each		Includes cap for opposite end
<b>RBS049 (NOT SHOWN)</b>	Basic sidewinder control 1:4 Super lift	Each		Includes cap for opposite end
<b>RBS050 (NOT SHOWN)</b>	Basic sidewinder control 1:1 Speedy lift	Each		Includes cap for opposite end
<b>RBS051</b>	Remote control	Each	140mm x 60mm	Includes 7 day timer. White with wall mount.
<b>RBSTEELROD</b>	4mm Steel rod	3m Length	4mm diameter	100g per metre length. Zinc plated steel. Can be cut with hacksaw
<b>RBFIBREROD</b>	4mm White fibreglass rod	6m Length	4mm diameter	24g per metre length. Can be cut with hacksaw
<b>844</b>	4mm Economy fibreglass rod	6m Length	4mm diameter	24g per metre length. Can be cut with hacksaw. Same quality as standard rod but slight green hue.
<b>RB023</b>	Aluminium bottom weight bar	5m Length	22mm x 4mm	240g per metre length. Can be cut with hacksaw
<b>RB016C</b>	Small clear eyelet ring	Bag of 100	13mm x 8mm	Strong polycarbonate
<b>RB016W</b>	Small white eyelet ring	Bag of 100	13mm x 8mm	Strong polycarbonate
<b>RBCC</b>	Economy Roman blind cord clasp	Each	21mm x 16mm	Required to be BS13120 compliant
<b>RBCCS</b>	Roman blind cord clasp with sew on loop	Each	21mm x 13mm	Required to be BS13120 compliant
<b>RBCT (NOT SHOWN)</b>	Roman blind chain tidy	Each	21mm x 41mm x 15mm	Required if using RBS049 or RBS050. BS13120 child safety compliant
<b>03LW38</b>	38mm sew on loop tape	25m Roll		
<b>RB111025PB</b>	Polished brass bead chain	125m Reel	4.5mm Bead diameter	Made from brass- will not rust. 20kg minimum breaking strain
<b>RB111022PC</b>	Polished chrome bead chain	125m Reel	4.5mm Bead diameter	Made from brass- will not rust. 20kg minimum breaking strain
<b>RB111021SN</b>	Satin nickel bead chain	125m Reel	4.5mm Bead diameter	Made from brass- will not rust. 20kg minimum breaking strain
<b>RB111027BN</b>	Black nickel bead chain	125m Reel	4.5mm Bead diameter	20kg minimum breaking strain
<b>RB111029AB</b>	Antique brass bead chain	125m Reel	4.5mm Bead diameter	20kg minimum breaking strain
<b>RB111026BZ</b>	Bronze bead chain	125m Reel	4.5mm Bead diameter	20kg minimum breaking strain
<b>RB111028AS</b>	Antique silver bead chain	125m Reel	4.5mm Bead diameter	20kg minimum breaking strain
<b>RB11100055 (NOT SHOWN)</b>	Stainless steel chain	150m Reel	4.5mm Bead diameter	20kg minimum breaking strain
<b>RBPLIERS</b>	Joining pliers for bead chain	Each		Unique design- chain can be cut and joint using 1 pair of pliers

#### Alternative chain lengths for pre-packed blinds:

- RB075SS - Endless loop of stainless steel chain: 75cm
- RB075SS - Endless loop of stainless steel chain: 100cm
- RB125SS - Endless loop of stainless steel chain: 125cm
- RB150SS - Endless loop of stainless steel chain: 150cm

## PRE-PACKED ROMAN BLIND KITS

Hunter & Hyland have created a complete pre-packed blind system that contains everything you will need to make a beautiful Roman blind. It contains all the same components as would be provided in a Made-to-measure Roman blind. It complies fully with BSEN13120 with a smart pull away chain that simply clicks straight back into the head rail in the event of it being pulled away. There is no difficult re-attachment, no need for chain breakaway connectors or a wall mounted chain retainer.

### The pre-packed kit comes complete with:

- Profile with pre-attached hook tape.
- Child safe pulley housing to comply with BSEN13120.
- Bead chain- 1m drop standard length. Stainless Steel
- Universal smart swivel wall/ ceiling bracket.
- Small white plastic eyelet rings. 13mm diameter.
- 38mm sew on loop tape (to attach to face fabric).
- Cord clasp (RBCCS) to comply with BSEN13120 standards regarding child safety.
- 7 x rods.
- White aluminium bottom bar (22mm x 4mm).
- Easy step-by-step fitting instructions.

### Further information to consider:

- Pre-packed Roman blinds can be cut to size with a hacksaw.

### Technical specifications:

- Maximum blind load weights:
  - Super lift – 7kg - 1:4 (if you pull the chain 20cm it will rise 5cm).

## PRE-PACKED ROMAN BLIND SIZES

Code	Description	No. of cord spools	No. of brackets	Cord drop	Chain drop*
<b>RBS060SU</b>	60cm super lift pre-packed Roman blind kit	2	2	300cm	100cm
<b>RBS090SU</b>	90cm super lift pre-packed Roman blind kit	3	2	300cm	100cm
<b>RBS120SU</b>	120cm super lift pre-packed Roman blind kit	4	3	300cm	100cm
<b>RBS150SU</b>	150cm super lift pre-packed Roman blind kit	4	3	300cm	100cm
<b>RBS180SU</b>	180cm super lift pre-packed Roman blind kit	5	4	300cm	100cm
<b>RBS240SU</b>	240cm super lift pre-packed Roman blind kit	6	5	300cm	100cm

\* Alternative chains of 75cm, 125cm and 150cm can be purchased separately.

## TECHNICAL DIAGRAMS AND DATA

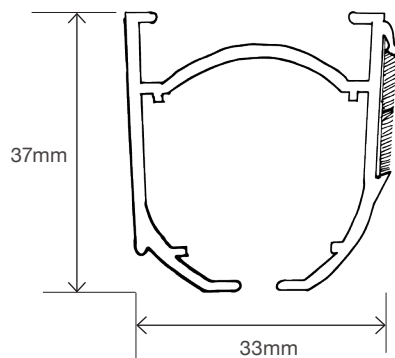

When you receive your Roman blind kit or components, you will also receive our Roman Blind System instruction sheet. This will take you through all the steps to not only ensure you have a fully child safety compliant blind system, but to also give you hints and tips to use all the elements to their optimum. The head rail is easy to assemble and fit and the instruction guide will cover any questions you might have throughout the processes of making and fitting your blind.

Technical information to note:

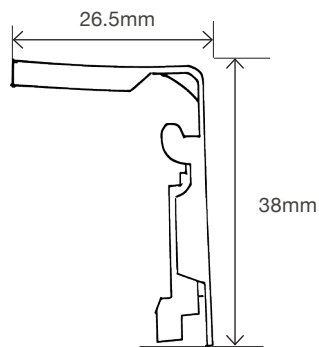

- The brackets supplied are designed to be able to be either wall (face) fixed or ceiling (top) fixed.
- The chain and cog are designed to breakaway from the main head rail if a force of 6kg or greater is applied. It can be re-inserted with a simple push and click.
- To maintain compliance with BSEN13120 regarding child safety; cord breakaways must be fitted if the distance between each fold is greater than 200mm (supplied with both made-to-measure and pre-packed kits).
- The chain drop has to be a minimum of 60cm from the floor to maintain compliance with BSEN13120.
